

# Advisory Alert

Alert Number: AAA20210430

Date: April 30, 2021

Document Classification Level : Public Circulation Permitted | Public

Information Classification Level : TLP: WHITE

## Overview

Product	Severity	Vulnerability
Samba	High	Unauthorized access

## Description

Affected Product	Samba
Severity	High
Affected Vulnerability	Unauthorized access(CVE-2021-20254)
Description	A security issue has been found in all versions of the Samba file server since Samba 3.6.0. A coding error converting SIDs to gids could allow unexpected group entries in a process token. This could allow unauthorized access to files.
Affected Products	All versions since 3.6.0.
Officially Acknowledged by the Vendor	Yes
Patch/ Workaround Released	Yes
Reference	<a href="https://www.samba.org/samba/history/security.html">https://www.samba.org/samba/history/security.html</a>
