

Advisory Alert

Alert Number: AAA20231127 Date: November 27, 2023

Document Classification Level : Public Circulation Permitted | Public

Information Classification Level : TLP: WHITE

Overview

| Product | Severity | Vulnerability |
|---------|-----------------|--------------------------|
| NetApp | High, Medium | Multiple Vulnerabilities |

Description

| Affected Product | NetApp | |
|---------------------------------------|--|--|
| Severity | High, Medium | |
| Affected Vulnerability | Multiple Vulnerabilities (CVE-2022-38087, CVE-2023-32252, CVE-2023-3489) | |
| | NetApp has released security updates addressing multiple Vulnerabilities in their products. CVE-2022-38087 - Certain versions of Intel BIOS Firmware are susceptible to a vulnerability which when successfully exploited could allow escalation of privilege and information disclosure via local access CVE-2023-32252 - Linux kernel versions prior to 6.4-rc1 are susceptible to a vulnerability which | |
| Description | when successfully exploited could lead to Denial of Service (DoS). CVE-2023-3489 - Several commands in Brocade Fabric OS v9.2.0 could log the FTP/SFTP/SCP server password in clear text in the SupportSave file when performing a downgrade from Fabric OS v9.2.0 to any earlier version of Fabric OS. NetApp recommends to apply the necessary patch updates at your earliest to avoid issues. | |
| Affected Products | NetApp HCI Compute Node BIOS NetApp HCI Storage Node BIOS NetApp HCI Baseboard Management Controller (BMC) - H300S/H500S/H700S/H410S NetApp HCI Baseboard Management Controller (BMC) - H410C Brocade Fabric Operating System Firmware | |
| Officially Acknowledged by the Vendor | Yes | |
| Patch/ Workaround Released | Yes | |
